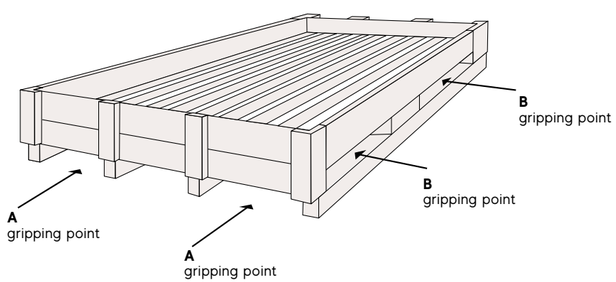
Packaging

Atlas Plan slabs can be shipped in wooden crates or on A-frames made of wood or galvanized steel, according to the customer's choice.

Crates



Crate storage
The wooden crates can be stacked on top of each other.
Up to 7 crates can be stacked.
Up to 9 crates can be stacked providing they are placed on a concrete floor.
However, it is not possible to place a load of different size than that of the crate itself on top.
The crates can be stored outdoors for up to 6 months.

A foam corner protection is applied when the slabs are loaded into the crates.
A polystyrene sheet is placed on the bottom of the crate.
The loading of each crate is then completed by applying a heat-shrink cap.

A-frame storage
A third A-frame can be inserted upside-down between two wooden A-frames placed side-by-side to optimise empty A-frame storage space.
Up to 6 galvanized steel A-frames can be stacked.

Transport on A-frames

Once loaded, the slabs are fixed to the packaging by applying four vertical straps.
The packaging is then covered by a heat-shrinkable cap. Incomplete loads must be balanced between the two sides of the A-frame.
